

MICROSOFT® DYNAMICS™ AX

A COMPLETE SOLUTION FROM AN EXPERIENCED PARTNER

When it's time to implement Microsoft Dynamics AX as your Enterprise Resource Planning (ERP) system, partner with the company that offers the vision and skill to help you achieve your goals. MAVERICK Technologies is uniquely qualified to support your needs with vast expertise in plant-floor operations, ERP system installation and Microsoft Business Solutions.

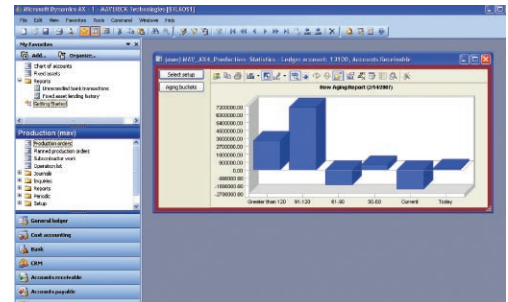

Although ERP systems address high-level business integration issues, many ERP consultants lack the insight and real-world experience needed to effectively integrate all business operations. But MAVERICK is different. We have years of practical experience in manufacturing and process industries, plus extensive training in best practices, safety and compliance.

With know-how that extends from the plant floor to the boardroom, we make educated recommendations that facilitate real-time access to data, bringing knowledge across all facets of your enterprise. We continually build on our foundation of successes, applying proven strategies to your organization. Then, by implementing your new ERP system on time and on budget, we enable you to meet your business goals. Together, our expertise and holistic perspective allow us to evaluate all your operations to develop a more effective ERP solution.

Seamless Integration

MAVERICK's specially trained service team can install Dynamics AX quickly and facilitate seamless integration with each facet of your business. You will always work with MAVERICK professionals who understand the needs of your specific industry and can implement targeted tools to aid in planning, manufacturing, sales, inventory, ordering, customer service and HR.

Whether you have multiple departments at one location, or many plants and offices around the world, we can scale your ERP solution to improve communication and standardize practices throughout your enterprise. As a Master Systems Integrator, MAVERICK can serve as your global project manager to orchestrate simultaneous installations and training sessions, or stagger the implementation. We provide a single point of contact and responsibility for your entire ERP system to ensure the software installs effectively within your timeframe.

A Trusted Microsoft Partner

MAVERICK is a long-time Microsoft Certified Business Solutions Partner. MAVERICK thoroughly understands how to optimize the software to achieve maximum business benefits.

Microsoft commissioned us to develop the software's official training curriculum, which was distributed to the company's other partners and customers. In addition, we created several manuals, e-courses and exams that have helped define the software and facilitate its broad use. Our functional expertise, comprehensive knowledge of the software and certified staff make us especially qualified to assist clients with installation, training and ongoing support for accounting, finance, supply chain management and other business areas. Many businesses have even hired us during the implementation phase to answer questions, supplement other partners, speed the process and ensure that the program gets up and running properly.

Customer Success Stories

“Through leveraging Microsoft’s Dynamics AX solution and MAVERICK’s deep industry expertise, LaBarge Pipe and Steel has seen a significant increase in sales through converting more quotes to sales orders, much tighter control of our inventory and greatly improved access to the vital information needed to make critical business decisions.”

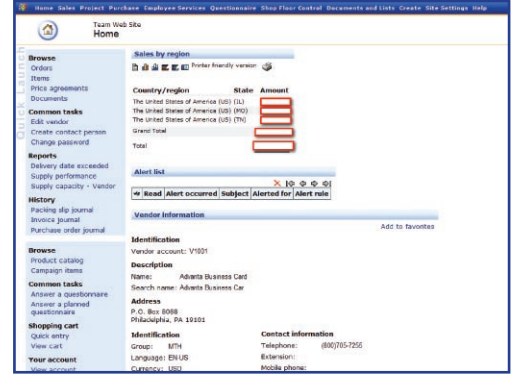

– Pierre LaBarge, President, LaBarge Pipe and Steel Company

“MAVERICK Technologies deployed Microsoft Dynamics AX very quickly to enable our startup operation to transact business in eight weeks. Over the past year, MAVERICK has added significant functionality as our business needs have continued to change. We’ve integrated our third-party logistics system, our phone system and our online expense management system into Microsoft Dynamics AX. We also use Dynamics AX to track receiving and shipping of containers from our manufacturing facilities in China. Microsoft Dynamics AX accommodates our changing and growing business very well because it is flexible, easy to configure, and easy to integrate with other systems.”

– CEO, Access Point Medical

Are you ready to partner with MAVERICK to optimize Microsoft Dynamics AX for your business?

MAVERICK Technologies is a next-generation engineering, systems integration and operational consulting firm. We deliver innovative solutions for a wide range of manufacturing and process clients, leveraging our extensive network of skilled employees deployed from regional and international locations. Our talented staff is dedicated to helping our clients break away from the business inefficiencies they face. We deliver profitability improvement — individually in plant automation, performance management and business systems, and holistically by integrating knowledge across the enterprise.
